

April 10, 2025

Dear Valued Customers,

The Federal Consumer Carbon Tax is ending in April 2025, and as a result we are removing the Federal Carbon Surcharge from our invoices effective **April 14th, 2025**.

British Columbia, Quebec and Newfoundland will maintain provincial legislation for environmental mandates:

- British Columbia: BC Carbon Tax Act (S.B.C. 2008, c.40); and the BC Low Carbon Fuels Act (S.B.C. 2022, c.21)
- Québec: Environment Quality Act (C.Q.L.R. c.Q-2)
- Newfoundland and Labrador Diesel Tax

To align with these environmental legislations, we are implementing the following Surcharges, effective April 14, 2025.

- BC Environmental Surcharge: 0.90% of freight cost (inbound or outbound)
- QC Environmental Surcharge: 0.90 of freight cost (inbound or outbound or through)
- NL Environmental Surcharge: 2.10% of freight cost (inbound or outbound)

These surcharges ensure alignment with ongoing provincial environmental mandates while allowing us to maintain the high level of service you expect.

Please reach out to your sales representative should you have any questions or if we can support your business further in these challenging economic times.

We thank you for your continued partnership and support.

Best regards,
